Aleksiev, V. M. ON ONE PROBLEM WITH A SMALL PARAMETER. [1962] [1962], 6 refs. Order from OTS or SLA \$1.60	63-10728 I. Aleksiev, V. M.
Trans. of Moscow U. Vestnik. [Sertya 1: Matematika, Mekhanika] (USSR) 1962 [v. 17] no. 4, p. 17-27. DESCRIPTORS: *N-body problem, *Celestial mechanics, *Differential equations, Functions, Inequalities, Mathematical analysis. A system of ordinary differential equations is considered. Its solutions tend to discontinuous functions if the small parameter approaches zero. This result is applied to the problem of three bodies in celestial mechanics. (Author) (Astronomy--Astrophysics, TT, v. 10, no. 4)	Office of Technical Services

<p>Alekseev, V. M. NEW EXAMPLES OF "CAPTURE" IN THE THREE-BODY PROBLEM. [1962] [18]p. 10 refs. Order from OTS or SLA \$1.60 63-10330 Trans. of #Astronomicheskii Zhurnal (USSR) 1962, v. 39, no. 4, p. 724-735. DESCRIPTORS: *N-body problem, Motion, Gravity, *Celestial mechanics, Differential equations. The paper deals with the construction of new examples for the motions in the problem of three material points, attracting each other in accordance with Newton's law, where the phenomenon of "capture" occurs. The ap- plied methods are of a pure qualitative nature and numerical integration is not used. The constructed ex- amples are of a general nature and contain a total number of free parameters. (Author) (Astronomy--Astrophysics, TT, v. 9, no. 12)</p>	<p>63-10330 1. Title: Three-body problem 1. Alekseev, V. M. Office of Technical Services</p>
